# Training Needs

## IT TRAINING

The shift to digitalization began before the pandemic, but the crisis has significantly accelerated it. With more applications, digital processes, and users relying on these technologies, it's crucial for both employees and students to upgrade their skills. Employers recognize the value of IT certifications, with 91% considering them essential for hiring and predicting employee success, according to a CompTIA study. Earning industry-recognized IT certifications can set you apart in a competitive job market, enhance career growth, and pave the way for a rewarding career.

## PROJECT MANAGEMENT TRAINING

Structured project management training equips managers with essential tools and techniques to navigate inevitable changes effectively. As demand for certified leaders grows across various industries, Acquire Centre offers a classroom-based project management training and certification program tailored for current and aspiring leaders. The program, led by experienced certified project managers, covers Predictive and Agile methodologies and prepares candidates for certifications such as PMI's Project Management Professional (PMP), Certified Associate in Project Management (CAPM), CompTIA Project+, and Professional Scrum Master.

Attending project management training offers several benefits, including:
